HPL Focus— Linking Connection finding

'The ability to use connection from past experiences to seek possible generalisations'

Student Reminders

Behaviour in Lower C Block

We are focusing the next few weeks on taking care of our school and Lower C block. This means we will be monitoring the use of the toilets. When using the toilets we will be limiting the number of students entering to 2 students at a time. You will have to sign in using the sign in sheet before using the facilities. This will allow us to monitor and take care of our school.

Christmas Card Competition

Please see the Teams post from the house team in our Year 7 Teams. We would like our students to design a CCS Year 7 Christmas Card for this year.

HPL Focus

The HPL focus for next week is connection finding.

Please find below some strategies for getting the most out of Linking

1. Think about whether what works in this circumstance is a general rule. Would it always work?
2. Always be looking for patterns.
3. Consider whether you can create more links if you approximate: 'this is not exactly the same but it's a bit like....'
4. Try starting from a big idea and then seeing how all the small pieces are really connected to this.
5. Sometimes it helps to think in the abstract, in symbols or pictures, not just in words. Try concept maps or other visual techniques or use formulas.

Mrs Husband and Miss Cambio

Computing Success in Year 7

Since October students in Year 7 have been completing homework tasks and earning points towards achieving their Bronze iDEA Award. iDEA is a website which aims to develop students' digital, enterprise and employability skills through a range of online challenges. Students complete tasks of varying lengths and difficulty with the aim of achieving badges towards their award. Their objective is to earn the 250 points required to gain their Bronze Award.

Jacob, in 7SHL, has great resilience and determination in order to complete all tasks and achieve his Bronze Award in less than 5 weeks. This is an incredible achievement and as well as achieving his award Jacob has set a new CCS record for achieving the Bronze Award in the quickest time. Jacob has now started working towards achieving his Silver Award and has already acquired 120 of the 400 points required. We want to say a huge congratulations to Jacob for his dedication and hard work and wish him good luck in his next challenge.
