

Dear Parents and Guardians,

At the heart of everything we do is a simple mission: to help children grow, learn, and thrive by serving meals that are not only healthy but also tasty and enjoyable.

Our chefs and nutrition team work hard to create meals that go above and beyond the usual standards. We make sure every dish is balanced and made with care, following trusted national guidelines to support your child's health and wellbeing.

We know how important it is, especially in uncertain times, to keep providing great food at a good value. Rising costs in food and staffing are affecting everyone, including schools. We have been working behind the scenes to manage these changes without letting quality slip.

Even with these efforts, prices for ingredients and staffing continue to rise. As a result, we are expecting an overall increase in costs for the next school year.

We are doing everything we can to keep any changes to meal pricing as minimal as possible. However, we are required to increase the price of meals from £3.08 to £3.26 with the cost of other items rising by 6%.

Thank you for your continued support. We are proud to serve your children every day and are fully committed to giving them the best food and experience possible.

Kind Regards,

Chartwells Schools
